To what extent does the securitisation of modern stadia influence the affective atmospheres experienced by spectators?

PARTICIPANT INFORMATION SHEET

Central University Research Ethics Committee (CUREC) Approval Reference:

1. Why is this research being conducted?

It is being conducted to consider the impact of increased security and surveillance on people's experiences of public/semi-public space, which may inform the design of such spaces in the future.

2. Why have I been invited to take part?

You have been invited because you are involved in the construction and design of the Tottenham Hotspur Stadium/you are an attendee of the Tottenham Hotspur Stadium.

3. Do I have to take part?

No. You can ask questions about the research before deciding whether or not to take part. If you do agree to take part, you may withdraw yourself from the study at any time, without giving a reason, by advising me/us of this decision. The data will not be used in any way should this be the case.

4. What will happen to me if I take part in the research?

The online survey should only take 5-10 minutes, and requires no prior knowledge of the specific subject of the study.

If you take part, your responses will be anonymised and no further action will be taken. These responses will be stored securely and only seen by myself.

5. Are there any potential risks in taking part?

The following risks are involved in taking part: your personal data, albeit not sensitive, could be revealed to a wider audience than just me and my supervisor.

To reduce any potential risks, this personal data will be pseudonymised.

6. Are there any benefits in taking part?

There are no direct personal benefits to you from taking part, but the conclusion of this study might influence the future application of security in stadiums to make your match day experiences more comfortable in the long-run.

7. What happens to the data?

The information you provide during the study is the **research data**. Any research data from which you can be identified, such as age and audio recordings is known as **personal data**.

Data will be stored for at least 3 years after publication or public release of the work of the research.

The researcher and supervisor will have access to the research data. Responsible members of the University of Oxford may be given access to data for monitoring and/or audit of the research.

I would like your permission to use direct quotes against a pseudonym in any research outputs.

8. Will the research be published?

The research may be published in an academic publication, but this is uncertain.

9. Who has reviewed this study?

This study has been reviewed by, and received ethics clearance through, the University of Oxford Central University Research Ethics Committee.

10. Who do I contact if I have a concern about the study or I wish to complain?

a) For studies reviewed by a University research ethics committee only:

If you have a concern about any aspect of this study, please contact [insert primary researcher name and University tel. no. /ox.ac.uk email address] or [insert supervisor name and University tel. no. / ox.ac.uk email address], and we will do our best to answer your query. I/we will acknowledge your concern within 10 working days and give you an indication of how it will be dealt with. If you remain unhappy or wish to make a formal complaint, please contact the Chair of the Research Ethics Committee at the University of Oxford who will seek to resolve the matter as soon as possible.

11. Data Protection

The University of Oxford is the data controller with respect to your personal data, and as such will determine how your personal data is used in the study.

The University will process your personal data for the purpose of the research outlined above.

Research is a task that is performed in the public interest.

Further information about your rights with respect to your personal data is available from <http://www.admin.ox.ac.uk/councilsec/compliance/gdpr/individualrights/>.

12. Further Information and Contact Details

If you would like to discuss the research with someone beforehand (or if you have questions afterwards), please contact:
